

GETTING STARTED IN THE SOUND STUDIO

Turn on MOTU 16A I/O DEVICE

The MOTU 16A is the input and output device for the sound system in 706

Turn on Volume Controller

The Volume Controller is the device we use to adjust the playback volume in the control room.

Turn on Computer

Do not remove or attach any cables to the computer.

LOG-IN

Log into labuser

Turn on Speakers

Turn on the speakers that you plan on using. PLEASE NOTE: SPEAKER VOLUMES MUST NOT BE ADJUSTED. LEVELS NEED TO BE SET TO 0

Launch Application

Launch the application you plan on using. Check the Audio preferences. Make sure the audio device hardware is set to 16A

Please Find a Video lab Monitor if you are having problems turning the sound system on
