

Davinci Resolve System 1 Set-up Guide

Controller Set-Up

1. Open **DaVinci Resolve**
2. Go to: **Preferences** → Control Panels
3. Under **Color Grading Panel**, select:
DaVinci Resolve Mini Panel (USB)

Video & Audio I/O Set-Up (DeckLink)

1. Open: **Preferences** → **Video and Audio I/O**
2. Set the following options: **Capture Device**
Select: **DeckLink 4K Extreme 12G**
Monitor Device
Select: **DeckLink 4K Extreme 12G**

This allows Resolve to send video output correctly to the external monitor.

Other Important Set-Ups

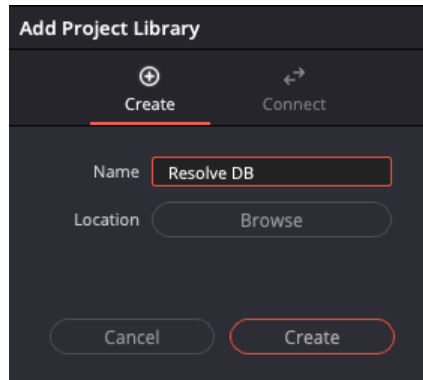

Resolve Project Library

To add or manage project libraries:

1. Open the **Project Manager**
2. Click:

Add Project Library (+)

3. Create or connect to the correct library location

Timeline Resolution Settings

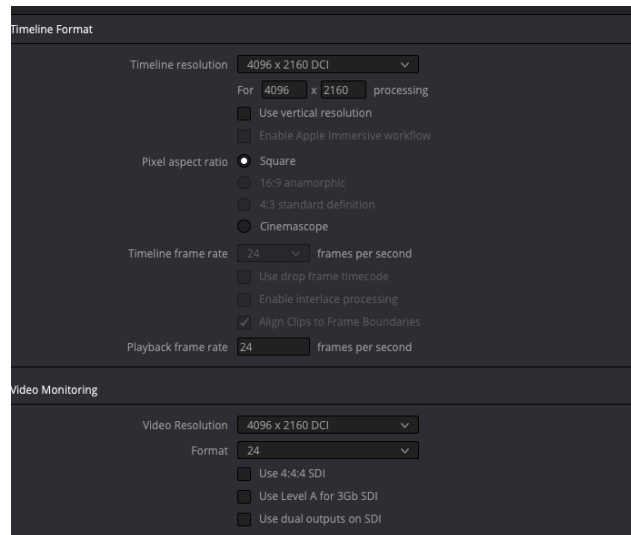

Timeline resolution is adjusted in Project Settings:

1. Go to:

Project Settings → Master Settings

2. Set:
 - Timeline Resolution
 - Video Monitoring Resolution

Make sure both match your workflow requirements

Quick Checklist

- Mini Panel connected via USB
- Control Panel selected in Preferences
- DeckLink chosen for Capture + Monitor Device
- Project Library added correctly
- Timeline + Monitoring resolution set in Master Set
